

# LABUSA Electronic Fax Solution for Health Care Professionals

LABUSA.com | 1-866-572-4867

For healthcare professionals sharing information creates a successful practice but comes with huge responsibility and risks. The industry standards for handling health information is established in the Health Insurance Portability and Accountability (HIPAA) Act. HIPAA establishes the regulations for use, distribution and disclosure of individuals Protected Health Information (PHI). Health care professionals covered under the HIPAA Act must reasonably restrict access to patients' health information.

Using traditional faxing solutions, client privacy can be compromised. As well, the manual process is time consuming, supplies and equipment is costly, and staff can't have access to information while traveling without the risk associated with carrying paper copies. However, not all electronic fax services are HIPAA compliant and may expose even greater problems.

## ***What is the solution?***

LABUSA Fax solutions allow you to - lower cost, reduce risks, limit liability, and increase service capabilities with our HIPAA Compliant fax solution.

Our solution includes:

- Fax Numbers - Local, U.S. Toll free, and international fax numbers available.
- Desktop/Mobile – Web, Email, and smart phone capabilities.
- Secure - SOC 2 Type II and SOC 3 fault-tolerant datacenter and network.
- Highly Available - Our service has 99.999% uptime.
- Highly Quality - Documents are transmitted as PDF digital imaged.

Our contract arrangements forms a "business associate agreement" between us and our client as pertains to the handling of protected health information (PHI) governed by the HIPAA.

## ***How does the service work?***

We provide you dedicated fax number and fax account. We help you integrate your fax account to your existing email client or smart phone, or use our web interface to send and receive faxes. Now you have full end-to-end encrypted and HIPAA compliant fax communication. For customized solutions we can integrate your existing web-based business applications to the LABUSA fax service.
