

Web and Hosting with Texas DIR

LABUSA.com | 281-393-8003

LABUSA provides website development and managed services in public, private, and hybrid cloud environments. The service offerings enable clients to expand their website and mobile application capabilities without compromising security while using the most cost-effective contracting solution in Texas.

Comprehensive Web Development And Managed Services

Texas Department of Information Resources

LABUSA offers preferred pricing and priority service on Web Development And Managed Services through the Texas Department of Information Resources (DIR) contract DIR-CPO-4414. The technology procurement method enables state and local government, education, other public entities in Texas, and some entities outside the state, streamline their purchasing process.

For more information, visit the website at <https://labusa.com/DIR-CPO-4414>.

Solution Overview

It is without question that in today's environment, the digital experience matters. The security, performance, and functionality requirements of a website are increasing exponentially. Organizations are finding it difficult to trends and standard practices for which they put their operations in jeopardy.

LABUSA provides clients with service and management support that enables them to be more innovative and agile in their internet presence. Organizations benefit from developing full-scale custom enterprise-class web applications without having the routine management and security risks. LABUSA provides hosting options within public cloud and private data center environments. Listed below is the overview of the services offered.
