

Electronic Fax as a Service

LABUSA.com | 281-393-8003

LABUSA Electronic Fax as a Service (eFaaS) is a hosted platform that enables sending, receiving, and managing of fax communication like how we handle Email. The significant benefit to eFaaS is that you do not have to worry about equipment expenses. Also, it is more secure and reliable compared to traditional faxing.

Solution Overview

LABUSA eFaaS has email-to-fax capabilities using the Zimbra Collaboration Suite®, a next-generation enterprise messaging and collaboration software. The system provides complete Email, contacts, calendar, and file sharing with supported fax documents in Word, Excel, PowerPoint, TIFF, Adobe PDF, and standard text formats. Incoming faxes are in Adobe PDF format.

End-User Feature Benefits

- Simultaneously send and receive fax without a busy signal
- Faxes are stored and transmitted through the system using 256-bit encryption
- Port existing toll-free or local numbers or get new numbers in any area code
- Any Place and Any Machine with AJAX-based end-user interface (cross-browser/OS)
- Dedicated hosted environment for better security and performance

Why LABUSA eFaaS

You shouldn't spend more and get less! More than just a cost-effective alternative, LABUSA eFaaS offers advanced security and support for protecting fax transmission and storage. Industries such as healthcare, financial services, and government have regulations that require security compliance with the LABUSA eFaaS offer. The feature-rich email-to-fax portal offers the ability to customize the workflow around the way you do business.

LABUSA fully supports the infrastructure, provides system administration, and help desk support for the end-users. The service includes 99.999% availability and phone and email support 7:00 am - 6:00 pm CT Monday – Friday.

“We believe that technology should align with business goals, protect, improve, and generate a better return. We help deploy solutions and provide the support to ensure it.”
